

La Strada International

NGO Platform against trafficking in human beings

Workshop Data collection 20 November 2019 Istanbul, Turkey

Workshop questions

- What data is collected by the LSI member organisations? How is data collected and registered?
- What are efficient data collection methods, processes and instruments to be used for data collection?
- What data can be common collected and compared and what purpose would it serve? How to increase visibility & evidence collection with own data?
- How can data be effectively collected and shared without additional workload for members?
- What is the impact of the GDPR?
- What can be recommended for further action?

Why do we collect data?

- For lobby and advocacy (evidence collection)
- For obtaining knowledge (monitoring) situation and trends
- For impact assessment were we effective; did we have impact?
- For adjusting services
- For visibility of the organisation
- For funding opportunities

Who owes the data; we have data others want to know

Examples of global initiatives

- <u>UNODC's Global Report</u> 'overview of patterns /flows of THB at global, regional & national levels (basis cases detected)
- Multiple Systems Estimation (MSE) is an innovative statistical approach to estimate the size of hidden populations
- IOM Counter Trafficking Data Collaborative (CTDC): a global data repository on THB with data contributed by countertrafficking partner organizations around the world.
- UNODC <u>global dataset</u> on detected and prosecuted traffickers, which serves as the basis in their <u>Global Report</u> for country profiles.
- Measuring Government Response: Walk Free Government
 Response basis assessment of indicators of good practice

LSI past experience & Bottlenecks

- Different information is collected, ways of collecting information differs too
- No adequate data collection (monitoring) systems
- There are data protection issues
- Data is not comparable much dependent on national situations, context and definitions
- There is no common language
- There is no capacity/funding for additional workload
- No agreements on what data to share and when will it lead to better data/information?

What data is collected on services?

- Victim support services (client data, referrals, individual services provided; follow up
- Quality of services and impacts: rights protection
- Helpline services and prevention work
- Lobby and advocacy meetings/events
- Capacity building
- Legal court cases
- Impact of services (what changes has been reached)

https://polarisproject.org/sites/default/files/Polaris National Hotline 2018 Statistics Fact Sheet.pdf

What monitoring data is collected?

- Information about number of downloads or dissemination of studies, reports, articles published
- Examples of how studies/reports are used?
- Lists of participants of meetings, events, trainings you organise?
- Follow up questions or surveys after such events?
- Lists of stakeholders who cooperate with (your)
 victim support or shelters, including referral partners
- Data or scoring of quality of victim support/shelter?
- Data on clients using (your) victim support/shelters?

What monitoring data is collected?

- List of lobby or advocacy initiatives, and what topic, with whom?
- List of examples of changes in legislation, regulation or implementation and practices, on which you may have had influence?
- Data on quality of victim support system at national, regional or local level?

How do you rate the strength of your organisation on?

- Collecting data about results and progress
- Analysing such data
- Reflecting on such data and actually using it to improve

Suggested

- Sharing annual data/reports or statistics (for LSI annual report)
- Common annual questionnaire providing input on national situation
- Agree on sharing (some) common statistics
- Case collection on common topics
- Annual research on specific topic common template
